

Practical 12: NotebookLM Project

Aim:

To create revision notes using NotebookLM.

Objectives:

- To generate study guide
- To create flashcards

Materials Required:

- NotebookLM

Procedure:

1. Create NotebookLM project – Start a new project in NotebookLM to organize your materials and AI-generated outputs in one workspace.
2. Upload two resources – Add two documents or sources to the project so the AI can analyze and reference them.
3. Generate study guide – Use NotebookLM's tools to create a structured study guide summarizing key concepts from the uploaded resources.
4. Generate flashcards – Automatically produce flashcards that highlight important facts, terms, or ideas for easier review.
5. Review accuracy – Carefully check the summaries and flashcards to ensure all information is correct and reflects the original resources.
6. Take screenshots – Capture screenshots of the study guide and flashcards to document your work or include them in your submission.

I Combined Study Guide
Module 1: Digital Literacy & Office Productivity
Goal: Master essential digital tools for professional environments.

- Professional Communication:
 - Resume & Presentation: Design professional resumes using templates and create 7-slide career presentations with animations [1].
 - Email Etiquette: Compose professional emails for internship applications with attachments [2].
 - Digital Identity: Manage a LinkedIn profile by adding skills, a bio, and privacy settings to control who views posts or messages [3].
- Data Collection (Google Forms):
 - Surveys: Create forms with MCQs, rating scales, and checkboxes. Analyse [4].
